When interest rates are higher than or slightly below the level at time of purchase, the MVA will result in a deduction. If interest rates are down significantly,
	a positive MVA will be added. Should a negative adjustment apply, the amount charged will not result in your earning less than the minimum guaranteed rate less any applicable withdrawal charge. MVA does not apply to withdrawals representing free withdrawal amounts, premium guarantee (if applicable), or death benefit. Taxes, Tax Advantages & Tax-Free Transfers						
Tax Deferral	Federal income taxes are deferred until the year interest is withdrawn. <sup>3</sup> There is no tax deferral if the owner is a corporation. If the owner is a trust or other entity, please consult a tax advisor regarding the tax-deferred status. The return of principal may also be taxable on tax-qualified annuities, such as traditional IRAs.					
Tax-Advantaged Income	Once the contract is annuitized, part of each annuity income payment is considered a tax-free return of principal (except tax-qualified annuities, such as traditional IRAs, where the principal may also be taxable).					
Pre-59½ Withdrawals	Withdrawals of interest prior to age 59½ may be subject to a 10% federal early withdrawal penalty. The penalty may be waived for death, total disability (as defined by the IRS), or if the payment is made as part of a series of substantially equal payments for the life expectancy of the owner (except tax-qualified annuities where the entire amount withdrawn may be subject to a 10% federal early withdrawal penalty).					
Tax-Free Exchange	May be used for exchanges from a life insurance or endowment contract or another annuity. <sup>4</sup> A 90-day rate lock applies. To maintain non-taxable status, the owner and annuitant must remain the same, and the owner cannot take receipt of the funds.					
Tax-Qualified Plans	May be a tax-qualified contribution, or a transfer or direct rollover of funds for IRAs, SEPs, Keoghs or 401 (k)s. <sup>4</sup>

Tax-qualified contracts such as IRAs, 401 (k)s, etc., are tax deferred regardless of whether or not they are funded with an annuity. If you are considering funding a tax-qualified retirement plan with an annuity, you should know that an annuity does not provide any additional tax-deferred treatment of earnings beyond the treatment by the tax-qualified retirement plan itself. However, annuities do provide other features and benefits such as income options.
