GS Momentum Builder® Multi-Asset Class Index

Consider a Path with Indextra

The Indextra Series of products (Indextra) offers both growth potential and income guarantees. Allocate your account value among five interest crediting choices, including four indexed interest options. Indextra, issued by Integrity Life Insurance Company (Integrity), is a single premium deferred fixed indexed annuity that earns interest based on changes in a market index, which measure how markets or parts of markets perform.

Sponsored by global investment bank **Goldman Sachs**.

A market index associated with the **Indextra** fixed indexed annuity.

Used in allocation options with **no interest rate cap**.

An Index Custom Designed for Annuities

Indextra's one-, two- and three-year allocation options reflect the performance of the GS Momentum Builder® Multi-Asset Class (GSMAC) Index. Goldman Sachs custom designed the index for:

- **Diversification:** Mixing a wide variety of asset classes – including international equities, international bonds and commodities – may provide return consistency over long periods.
- **Dynamic Asset Allocation:** A rules-based strategy based on momentum-investing principles allocates more to recent outperformers and less to recent underperformers based on past performance over three-, six- and nine-month periods.
- **Stability:** Volatile markets can significantly impact performance. Monthly portfolio rebalancing may dampen risk and smooth returns in both rising and falling markets. Volatility is monitored daily and, to the extent the volatility cap is exceeded, the Money Market allocation is increased.

An Index that Pursues a World of Opportunity

The GSMAC Index aims to deliver returns that maximize gains for a given level of volatility. Six diverse asset classes are rebalanced monthly, offering long-term potential for more consistent returns across different market cycles, both high and low. Still, index objectives may not be met. Diversification may not protect against market risk.

Asset class maximum weights are as follows: US Equity 30%, International Equity 60%, US Bonds 100%, International Bonds 60%, Commodities 50% and Money Market 100%. For asset classes with two component indexes, neither may comprise more than half the maximum weight. The index is controlled for a 4.5% volatility target and a 5.0% volatility cap.

Global Potential for Your Retirement Path

GSMAC Index: One-, Two- and Three-Year Point-to-Point Allocation Options

The allocation options credit positive interest, if any, by measuring the index value at two points in time (the start and end dates of the crediting period). The actual interest rate credited is the point-to-point return of the index adjusted by a participation rate, which may be less than, equal to or greater than 100% (the minimum is 10%). A new participation rate is declared each crediting period. Typically, the longer the crediting period, the higher the participation rate.

Remember, you never participate in losses of the index, so the higher the participation rate, the better. And there's **no interest rate cap** imposed by Integrity to limit the upside return of the allocation option.

Hypothetical Performance: Looking Back to 2002

The index began on July 25, 2014, but how might it have performed had it been around since 2002? Shown below are actual calendar-year returns since index inception, and hypothetical one-year index returns starting on the first day of each year that the index would have been published.

One-Year Returns		
Actual		
Start Date	End Date	Return
1/4/17	1/4/18	10.70%
1/4/16	1/4/17	2.30%
1/5/15	1/4/16	-2.64%
Hypothetical (Back-Tested) ¹		
1/6/14	1/5/15	5.95%
1/4/13	1/6/14	5.65%
1/4/12	1/4/13	3.66%
1/4/11	1/4/12	7.65%
1/4/10	1/4/11	3.64%
1/5/09	1/4/10	1.13%
1/4/08	1/5/09	0.90%
1/4/07	1/4/08	3.86%
1/4/06	1/4/07	1.63%
1/4/05	1/4/06	12.08%
1/5/04	1/4/05	1.19%
1/6/03	1/5/04	4.75%
1/4/02	1/6/03	6.22%

Average Point-to-Point Returns 1/4/02 – 1/4/18 ^{2,3}	
1-year	3.99%
2-year	7.89%
3-year	12.45%

Hypothetical and actual index returns are not indicative of future results. Index weights may not be optimal. A different combination may perform better. The index is not actively managed. Component indexes are sponsored by Goldman Sachs, unless labeled otherwise. The index has a 0.50% embedded yearly expense that reflects costs associated with replicating the index. The hypothetical index returns above already reflect this expense. Issuer is contractually bound to purchase the investments related to this option from Goldman Sachs. If the index change over the crediting period is 0% or lower, account value is credited with 0%. Account value is credited at end of the chosen period. Withdrawal charges reduce account value. Allocation options and crediting periods may be changed or eliminated in the future. If an index is eliminated or substantially changed by its sponsor, we will notify you and make a reasonable substitution.

- 1 Hypothetical data reflects application of index methodology and selection of index components with the benefit of hindsight. No hypothetical can completely account for the impact of financial risk in actual trading. Many factors not accounted for can affect actual performance. Source: GS Securities Division, January 2016.
- 2 Performance based on hypothetical returns prior to 7/25/14 (index inception) and actual returns thereafter.
- 3 Returns reflect point-to-point data starting each day the index would have been published, averaged for all possible 1-, 2- and 3-year periods. Returns reflect the performance of the index only and not the participation rates associated with the product.

About Goldman Sachs

Goldman, Sachs & Co. created the GS Momentum Builder® Multi-Asset Class Index for the Indextra fixed indexed annuity. Goldman Sachs is a recognized global investment banking, securities and investment management firm that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and high-net-worth individuals. Founded in 1869, the firm is headquartered in New York and maintains offices in all major financial centers around the world.

About Indextra

Each version in the Indextra Series has a different set of current rates, including participation rates and interest rate caps. A financial representative may offer only one Indextra Series version. Indextra is not a security. It does not participate in the stock market or any index. It is an insurance contract designed to help you address your long-term retirement income needs. The GS Momentum Builder® Multi-Asset Class Index allocation option is just one of the paths available to you in Indextra. Talk to your financial professional to see if this unique strategy may suit you.
